

EPV Real-Time Cabling Management Solution

The latest innovation from the leaders in cable infrastructure management:
Introducing the EPV™ Cabling Management Solution.

The EPV is a device based risk-free solution that gives you an accurate, real-time picture of your organization's cabling infrastructure – at any time and anywhere.

The EPV has been designed to be easy and simple to deploy and implement, and does not require any additional software or server installation.

Information regarding the connections throughout your panels and communication racks is constantly and automatically collected by the system, and delivered via a user-friendly, permission-based GUI on Internet web browsers, making it accessible wherever there is Internet connectivity. All connectivity changes are detected immediately, enabling the system to send notifications and real-time alerts the moment a change occurs, both to the system GUI and via email.

EPV is simple to install. The hardware components of the system (either an EPV Central and EPV Scout or an EPV Controller, depending upon the topology of the network) connect easily to panels in the communication racks. Once this hardware is connected to the network, EPV is ready to start providing you with the comprehensive, up-to-date connectivity information you need to manage your cabling infrastructure effectively.

As an additional advantage, EPV can be upgraded easily into PatchView, the industry's leading full-featured intelligent infrastructure management solution.

Key Capabilities:

- Simple to set up – 'plug-and-play' with no software installation required
- Up-to-date connectivity status monitored and maintained automatically in real time
- Export to Excel
- Immediate discovery of connectivity status changes
- Real-time alerts and email notifications
- Data accessible on-site or remotely through a user-friendly GUI accessible from Internet web browsers
- Change history
- Supports RiT standard intelligent connectivity components
- Easy upgrade to RiT's PatchView IIM solution
- CE, UL & RoHS compliant
