600mm Wide Server Racks

Over IP Group Server Racks are one of the leaders in cutting edge design and customisation in the enclosure market.

Our Server Racks address cooling, power management, cable reticulation management and infinite adjusting of any equipment type from the leading server manufacturers.

The need for deeper racks and better technology to address the concerns of power density and cooling is more critical than ever. Over IP Group addresses these concerns both in the Server Rack portfolio and the High Density Racks.
