

SitePro

Everything you need to know, in the palm of your hand

SitePro™, a software application for installation on PDA devices, is a vital tool for IT professionals and infrastructure engineers on the move, bringing PatchView™ and SiteWiz™ advanced infrastructure management and asset management capabilities - and an array of other essential tools - out into the field.

The SitePro personal task manager and information center is designed for use in the datacenter, communication room or virtually anywhere else on site. SitePro guides users through specific tasks, stores and displays extensive information and facilitates automated management and provisioning operations. SitePro is fully synchronized with PatchView and SiteWiz solutions through a user friendly GUI, ensuring smooth and easy infrastructure implementation and daily operation.

Features

- Personal task management including 'Skip' function
- Display of devices and their complete links (from switch to server/station)
- Online connection with either PatchView or SiteWiz solutions
- Online messaging – receiving / sending notes
- Location-based and function-based search mechanism
- Real-time error tracking, resolution and documentation (PatchView only)

Benefits

- Allows concurrent work of several engineers
- Enables easy, error-free implementation and maintenance processes
- Optimizes control of tasks and work orders
- Decreases downtime – problems are immediately addressed at the source
- Enhances communication between planner and field engineer
- Improves overall efficiency and productivity
