Vertical & Horizontal Cable Management **NetArc®** Server Racks

Cable Management has smooth plastic fingers set at 1U increments to allow cat6a shielded patch cords and OM4 fibre leads to enter and exit in an organized fashion.

We offer a large selection of vertical and horizontal cable managers for server racks to address today's cable demands.

Forever changing equipment can be paired to a number of standard and custom solutions both in rack and open frame racks with high-density kept in mind for maximum cable volumes.

	Part Number	Description
	IP16351	1U x 80mm deep finger cable manager – 9 zones
	IP16355	1U x 120mm deep finger cable manager – 9 zones
	IP16357	1U x 180mm deep finger cable manager – 9 zones
